

# SmartPanic

Your clients,  
**always**  
connected.

Available on:

# Comprehensive Security Anytime, Anywhere.

SmartPanics empowers users to report incidents swiftly to the monitoring center, offering multiple control and management features.

## 5 Customizable Buttons:

- SOS
- Fire
- Medical Assistance
- "On My Way" for safe commuting
- "Here I am" to inform your location

With every alert sent to the monitoring center, users receive personalized attention and gain access to multimedia features to enhance situational awareness:

## Become our strategic partner for expansive and cutting-edge business opportunities:

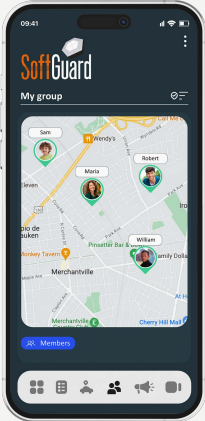

- Safeguard individuals around the clock, anywhere.
- Choose a connected app monitored 24/7 by an Alarm Receiving Center or service provider.
- Boost your Monthly Recurring Income (MRI).
- Foster customer loyalty.
- Harness GPS integration for fleet control and cameras for video surveillance.
- Benefit from 24/7 support, along with comprehensive technical and commercial training.

# Key Features

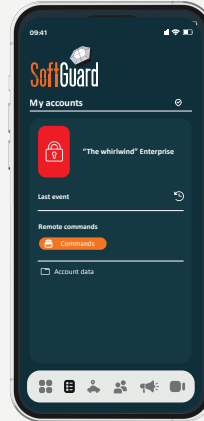

**SmartPanics** empowers users with swift and precise reporting of alarm events, ensuring seamless communication of location details to the monitoring center.

SmartPanics adapts to the unique offerings of each service provider. Consider this scenario: if a monitoring center specializes in SOS and Medical Assistance, those are the only buttons visible in "My Alarms," optimizing the user interface. It's more than simplicity; it's a screen tailored to immediate needs, fostering intuitive and friendly interactions.

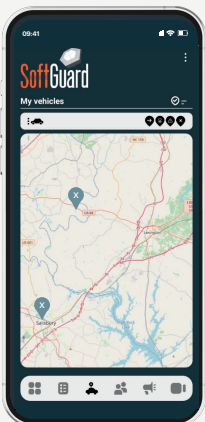

## My Group

- Centralize family or workplace security by integrating SmartPanics across various users into one cohesive group.
- Designate administrators and regular users.
- Get push notifications when other members seek assistance.

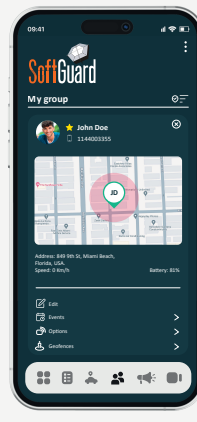

## Remote Commands

- Effortlessly arm/disarm alarm panels
- Open doors and windows
- Manage lights from anywhere.

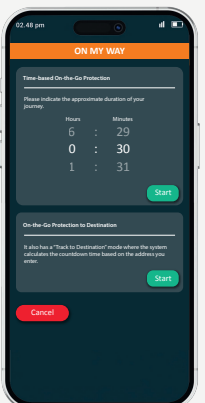

## My Vehicles

- Locate all GPS devices on the map in real time.
- Review position history, event reports, and essential data, including license plate, model, year, and speed.

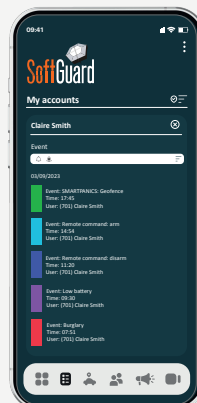

## Geofences

- Easily set up inclusion or exclusion zones for each user.
- Administrators will receive push alerts for entry and/or exit from the designated zone.

## On My Way

- Automatically initiate a countdown based on the declared time of arrival.
- Customize alerts for specific contacts, sharing route details and expected travel time.
- If the timer hits zero, it signals the monitoring center of a potential safety issue.

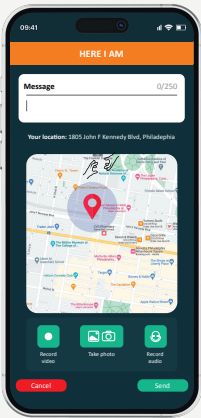

## My Accounts

- Effortlessly access and navigate through all monitoring accounts.
- View specific details for each account: users, zones, contacts, schedules, calls, notifications, alarm panel information, and more.
- Display the latest events, with the option to filter by type for a quick overview.

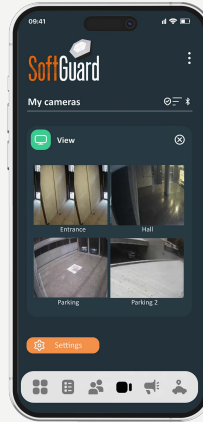

# Key Features

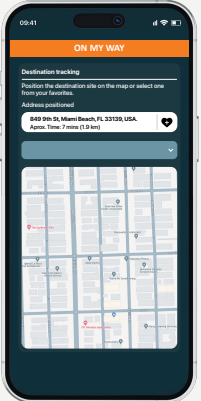

## Here I am

- Instantly share your precise location with group members through a push message.
- Include written messages, audio, photos, and videos for comprehensive reporting.
- Specially useful for children and elderly people.

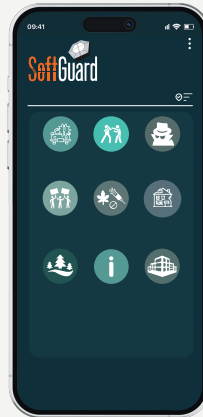

## My Cameras

- Integrate all CCTV systems via RTSP.
- Create custom grids for a personalized surveillance experience.

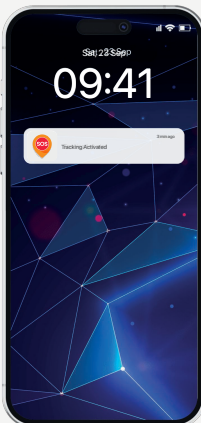

## Tracking

- Configure each app to periodically report its position to the server using time-distance calculations.
- Group administrators can activate this feature and change the time-distance frequencies in each user's app.
- Enable position reporting even when the app is in the background and not actively in use by the user.

## Utilities

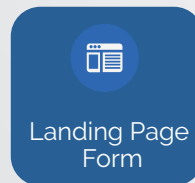

- Additional panel featuring up to 12 buttons, each customizable with unique icons and names.
- These buttons serve either as additional events or as shortcuts to specific websites.
- Customizable to suit different client segments, providing flexibility.
- Streamlines report categorization, traceability, and statistics compilation for the monitoring center.

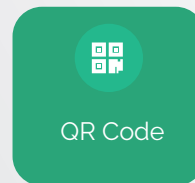

## Push Notifications

- Stay informed with relevant updates through pop-ups.
- Receive immediate alerts on your phone when a group member is in an emergency situation, or if an alert is triggered from your alarm system or GPS device.
- Get security tips, promotions, holiday greetings, account statements, and more.

# Bluetooth Button

The Bluetooth button for SmartPanics is a discreet yet powerful tool designed for quick SOS activation.

It's particularly beneficial for **vulnerable segments** such as **children facing bullying**, **elderly individuals who may need immediate assistance**, and **victims of gender-based violence**.

It can be configured to send a single alert, whether it's a panic, fire, or assistance event.

In situations where every second counts, fumbling with a smartphone can be a barrier. **The Bluetooth button resolves this by providing a way to report incidents discreetly without actually using the smartphone.** It's a solution that maximizes accessibility and minimizes response time.

## Technical Specifications

### EASY SETUP

Pair your button with the app in seconds.

### MATERIALS

Soft silicone touch.

### CONNECTIVITY

Connects to your device via Bluetooth Low-Energy.

### RANGE

Up to 50m from your device.

### DIMENSIONS

Ø 29mm x 8mm, weight 7g.

### COMPATIBILITY

Compatible with Android 5.0 and iOS 10 or newer.

### TOUCH

Designed with a perfect "click" sensation.

### BATTERY

Battery lifespan of up to 2 years.

### RESILIENCE

Robust and splash-resistant for indoor/outdoor use.

## Wearable Device

## Your DNA, Your App

Elevate your brand and profitability by tailoring SmartPanics to your unique identity.

### Here's how it works:

- **Custom Icon Design:** Personalize the app icon on your users' smartphones.
- **App Name of Your Choice:** Choose a name that resonates with your brand.
- **Branding Integration:** Infuse your logo and branding throughout all app pages, even the Splash Screen.
- **Exclusive Configuration:** Slave configuration ensures SmartPanics Signature connects exclusively with your monitoring center, no need to read QR codes or enter IP and ports.
- **White-label App:** Your company will appear as the developer on both the Google Play and App Stores.

### Benefits:

- **Boost your Regular Monthly Income:** Craft an app that aligns with your business model for improved revenue streams.
- **Foster Customer Loyalty:** Foster stronger connections by providing a branded, personalized app experience.
- **Differentiate from Competitors:** Stand out in the market with a unique app that reflects your identity.

## Tailored for Diverse Market Segments:

- Target broad audiences, particularly teenagers, to provide parents with peace of mind.
- Enhance safety for schools and universities, encompassing students, teachers, and staff.
- Provide exclusive safety benefits to union members.
- Implement corporate safety programs and enhanced control tools for sales teams or delivery fleets.
- Streamline operations for taxi agencies, car rentals, and public transportation services.
- Prioritize citizen protection and prevent gender-based violence events in local governments.
- Optimize communication channels for home assistance requests and appointments in health institutions.
- Foster customer loyalty, increase traffic, and enhance data consumption on cellular networks for Telcos and ISPs.
